Baggio International Shipping

Baggio International Shipping 67 S.p.A.

Multimodal Transports & Interlogistics

Let's go Worldwide!

International Shipping Company specialised in moving General and Project cargo

BIS 67 was founded by Francesco Baggio with the ambition to turn years of industry experience into a new, independent venture, built on **stronger foundations, modern management, and a forward-thinking vision**

We have been operating **in the sector since 1967**, building a solid track record of **58 years of experience** and expertise

BIS 67 is an organization that offers **multimodal transport and interlogistics services**

BIS 67 supports leading players in the **railway, energy, oil & gas, and heavy industry sectors** with expertise, efficiency, and a strong commitment to operational excellence

We are an organization with global coverage thanks to **7 branches worldwide** and a widespread network of agents

Wherever you want, how you want it: Your global logistics partner

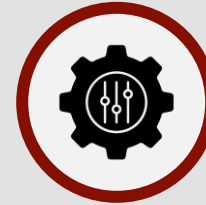

OUR PILLARS

**Specialized &
Qualified team**

**Complete &
Turnkey service**

**Customisation
& Fast delivery**

**Efficient & Safe
transport**

**BIS 67 aims at
offering an
innovative, fluid,
modern and
sustainable service**

In every project we analyse, plan, organise and manage the **international shipping of goods and freight of non-standard weight or size** to remote and critical locations

Thanks to **our experience and a network** spread worldwide, we are able to work with both **public and private companies**, supporting the development of even particularly complex, challenging projects

Wherever your business takes you, we're already there

We are able to handle any request,
no matter how complex or time-
sensitive, with the same level of
commitment

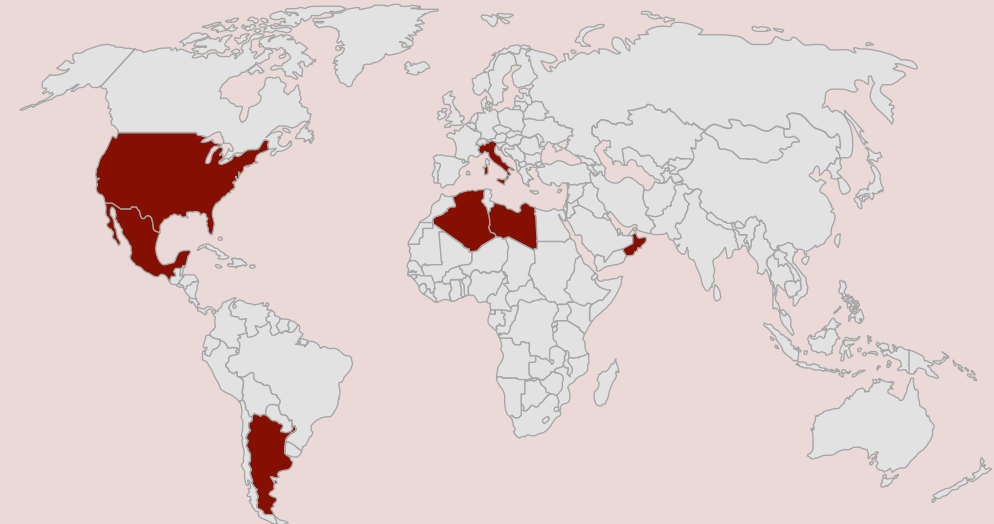

We are **strategically positioned** with branches in key regions and in addition to our own offices, **we have built a solid and reliable network of agents** across all continents.

This extensive network allows us to **operate seamlessly worldwide**, ensuring efficiency, flexibility, and rapid response times regardless of the destination or origin of the shipment.

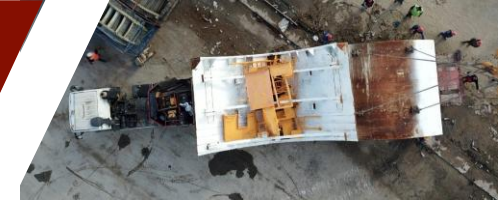

OUR GLOBAL COVERAGE

- **ITALY** - Bassano del Grappa (HQ)
- **USA** - Miami, Houston, Baltimore
- **ALGERIA** - Algiers, Skikda
- **ARGENTINA** - Mendoza
- **MEXICO** - Mexico City
- **UAE** - Dubai
- **LIBYA** - Tripoli

BIS 67 Certifications

We are fully **committed to upholding the highest levels of quality, safety, and compliance** in the freight forwarding industry

We recognize that operating in a global logistics environment requires not only expertise and reliability, but also strict adherence to international regulations and best practices

As part of our dedication to excellence, **we pursue and maintain all relevant certifications and accreditations required to operate** as a trusted freight forwarder on a global scale

Our certifications

Multimodal Transports & Interlogistics

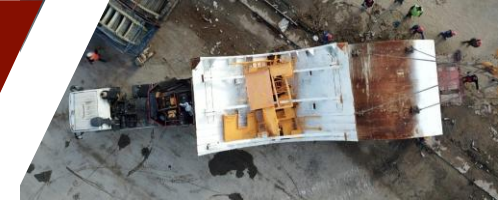

Baggio International Shipping

Our expertise

Areas of specialization and services

Areas of specialization

Transport of railway carriages

We are **specialized in the transport of trains and metro trains** for projects in the sectors of urban and extra urban rail mobility

Transport of oversized load

We are a **reliable partner for the transportation of oversized freight** that require the use of specific means of transport

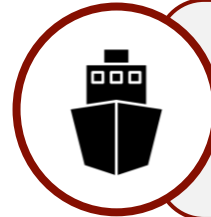

Services

We offer **road transport** solutions for reliable and cost-effective **national and international land shipments**

We provide efficient and reliable **rail transport** services, ideal for **medium and long-distance shipments** that require speed and cost-effectiveness

We offer **maritime transport** services as the most cost-efficient **solution for moving heavy cargo and large volumes** of freight across international routes

We offer **air transport** services as the fastest and most reliable solution for **urgent international deliveries** and high-value or delicate cargo, including oversized items

Areas of specialization: Railway carriages

We have a **lengthy experience** behind us in this specific sector, and a **deep knowledge** of all the dynamics, including the necessary resources to move and to ship in a safety manner this particular freight category

Our expert, qualified staff, together with a **careful analysis and planning of the most suitable route**, allows us to guarantee our customers the necessary support, **providing a reliable and safe service**, keeping to the timescale established

Over the years, **we have worked for leading train and locomotive builders worldwide.**

We contributed in a number of important projects, including the following underground railway systems:

- Casablanca
- Birmingham
- Manchester
- Oslo
- Taipei
- Honolulu
- Miami
- Copenhagen
- Milan

Areas of specialization: Oversized load

Our widespread network and our leading-edge resources allow us to schedule, manage and monitor the **transport of machinery, equipment, large supplies and oversized freight**

We carry out **preliminary studies and inspections** to ensure projects are feasible and to identify any risk factors. We carefully plan the best route to take, taking account of the customer's needs with the **aim of optimising delivery times and costs**. We guarantee a reliable service even for complex projects and in critical or difficult-to-reach destinations

We contributed in **construction of plant and installations** for public and private structures. We operated in different sectors, including:

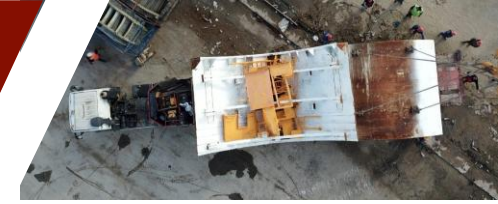

- Oil & Gas
- Renewable Energies
- Manufacturing
- Civil and Port Infrastructures
- Urban Mobility

Credentials

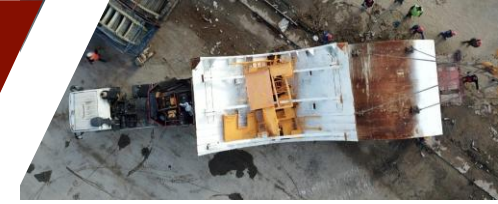

Railway transportation from Miami to Honolulu

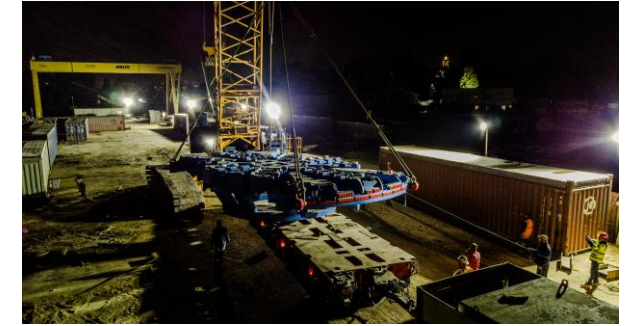

- BIS 67 successfully managed the end-to-end logistics for the **transportation of a full railway train**, ensuring the highest standards of safety and efficiency
- The operation required **meticulous coordination** and time-sensitive execution
- The transportation involved **several stages** and different modes of transport, each carefully planned to guarantee smooth transitions:
 - 1. Road Transport:** Transfer of the train components from the Miami site to the Port of San Diego using specialized heavy-duty vehicles
 - 2. Maritime Transport:** Shipment of the cargo from the Port of San Diego to Honolulu via a dedicated vessel, ensuring safe handling during the ocean crossing.
 - 3. Final Road Delivery:** Upon arrival at the Port of Honolulu, the cargo was transported by road

TBM transportation from Algiers to Rome

- BIS 67 managed the complex **relocation of a Tunnel Boring Machine (TBM)**, initially moved from Algeri then shipped to the Port of Civitavecchia, Italy. Upon customs clearance, BIS 67 coordinated the exceptional transport to Monterotondo
- The operation involved handling a **total volume of over 5,000 CBM**, with individual units weighing up to 155 tons, demanding precise engineering solutions and route optimization
- Through meticulous planning, strict adherence to safety standards, and **seamless coordination across multiple logistics phases**, BIS 67 ensured the flawless movement of critical infrastructure components, significantly supporting the progress of a major urban development project

Six out-of-gauge trucks transportation from UAE to Egypt

- BIS 67 successfully oversaw a complex **cross-border road transport operation**, moving high-value cargo between two strategic industrial hubs
- The project involved the **transportation of six out-of-gauge (OOG) trucks**, each loaded with a variety of highly specialized equipment, requiring bespoke handling solutions and precise coordination
- Despite **significant logistical and regulatory challenges across multiple jurisdictions**, BIS 67's Dubai team, together with its trusted partners, managed the entire operation through meticulous planning, risk management, and unwavering dedication, ensuring a safe and timely delivery
